

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## PREFACE.

---

The DIRECTORY for 1883 contains not only the usual publication, but in addition, a General and Business Directory of Frankfort and Ilion. In adding these two promising villages, the publisher hopes to subserve their business interests as well as that of Utica, and make the continuation of the enterprise a demand.

The Canvassers met this year with the usual obstacles in the work of gathering the names, and found their labors considerably increased by the unprecedented number of removals from one part of the city to another, and the large accession to our population; but experience, skill and liberal outlay have resulted in the best compilation the city has ever been favored with. In the fullness of its list of names, and the simplicity of its classification, this volume will commend itself as in advance of its predecessors.

We return thanks to the public generally who have kindly aided our canvassers in collecting the names and other information for the work, and more especially do we thank those who have so generously favored us with their advertisements, because without this patronage no full and complete Directory can be made except at a great pecuniary loss to the publisher.

This new patent Carpet and Rug Cleaning Machine adopted by us is acknowledged to be the most perfect ever invented, for it does not pound your carpets to pieces with ropes, sticks or straps, or dampen them with steam. But it frees the fabric of all dust and moths, and brightens the colors, giving an appearance of brilliancy and newness that cannot be obtained by any other process. No injury is done to the most badly worn carpet. A single trial will convince all of the superiority of this method over all others.

RULINGS OF THE DEPARTMENT, 1883.

Hereafter no matter can be forwarded in the mails after it reaches its original address without a new prepayment of postage, except letters which have one full rate paid thereon, namely, three cents, and newspapers or other periodicals which are to be forwarded to subscribers from one post office to another, which are in the same county where the paper to be forwarded is published, and in whole or in part printed.

Where matter of the second, third or fourth classes has been inadvertently forwarded without the payment of the additional postage required, it is to be rated up with only the amount due, there being no double postage charged in such cases.

Mail matter, before delivery, when forwarded to new post office address, should be charged the rate to which it was originally subject. Postal cards forwarded before delivery require one cent prepayment, whether written or printed.

**FIRST CLASS MATTER.**—Sealed letters to any part of the United States or Canada, three cents for each half ounce, or fraction thereof, prepaid; local or drop letters at offices where free delivery by carriers is established, two cents for each half ounce or fraction thereof, prepaid; where free delivery by carriers is not established, one cent for each half ounce or fraction thereof, prepaid; postal cards furnished only by the Government, one cent each.

**SECOND CLASS MATTER.**—Newspapers and other periodical publications issued at stated intervals, as frequently as four times a year, and sent from the office nearest the place of publication, must be prepaid at the rate of two cents per pound.

**THIRD CLASS MATTER.**—Books (printed and blank), transient newspapers and periodicals, circulars, and other matter wholly in print, proof sheets, and corrected proof sheets and manuscript copy accompanying the same, hand bills, posters, chromo-lithographs, engravings, envelopes with printing thereon, heliotypes, lithographs, photographic and stereoscopic views with the title written thereon, printed blanks and printed cards; and postage shall be prepaid thereon at the rate of one cent for each two ounces or fractional part thereof. Upon matter of the third class the sender may write his name or address, with the word "from" preceding the same, and may make simple marks intended to designate a word or passage of the text to which it is desired to call attention. There may be placed upon the cover or blank leaves of matter of the third-class matter, a simple manuscript dedication or inscription that does not partake of the nature of a personal correspondence. All packages of third-class matter must be so wrapped, with open sides or ends, that their contents may be readily examined by postmasters.

**FOURTH CLASS MATTER.**—Embraces blank cards, cardboard and other flexible material, flexible patterns, letter envelopes and letter-paper without printing thereon, merchandise, models, ornamental paper, sample cards, samples of ores, metals, minerals, seeds, cuttings, bulbs, roots, acions, original paintings in oil or water colors, and any other matter not included in the first, second, or third classes, and which is not in its form or nature liable to destroy, deface, or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service. First, third and fourth class matter may be registered by the payment of ten cents for each letter or parcel, in addition to the postage.

**MONEY ORDERS.**—Money may be sent to any part of the United States, Canada, Switzerland, Great Britain and Ireland, Germany, Italy and Newfoundland. Domestic rates on orders not exceeding \$15, ten cents; over \$15, not exceeding \$30, fifteen cents; over \$30, not exceeding \$40, twenty cents; over \$40, not exceeding \$50, twenty-five cents. **T**HE HARTFORD LIFE & ANNUITY INSURANCE COMPANY was established in 1879, by the most experienced insurance men of Hartford, Conn., who had been all their lives engaged in the old style of Life Insurance. They conceived the plan of insuring for the lowest possible premium and assessments that would guarantee perfect responsibility. The success of their plan was demonstrated by the cost of one policy held in Utica, taken on January 28, 1880, on a person then 47 years of age. He has paid every assessment to May 1st, 1883, on policies of \$5,000, amounting in all to \$183.00, or \$56.28 each year, or \$11.26 on \$1,000. At a less age the cost would have been less.

That there is no cheaper insurance, the above statement will show ; that there is no more perfect system of securing the amount insured, is shown by the names of its policy holders, among whom are officers of old style life insurance companies,

## **Leading Merchants, Bankers, & Lawyers**

throughout the whole United States. In Utica and surrounding country

**→POLICIES←**

## **To the amount of over \$500,000**

have been taken since December 1, 1882, showing that life insurance, when cheap and secure, is always a good investment.

If you are not insured and can afford to spare a small part of your income, take a policy for the benefit of your family.

### **YOU CAN INSURE FOR ANY AMOUNT,**

**From \$1,000 to \$15,000,**

at so small a figure yearly that you will not miss the amount it costs. Be sure and insure while your health is perfect. Don't wait until you are impaired.

## LAW AND PAMPHLET WORK IS MADE A SPECIALTY.

In both these and fine Cut Work we successfully compete with New York city,  
DOING WORK AS GOOD AND CHEAPER.

### JOB PRINTING.

The CITIZEN Job Office possesses facilities not excelled, either in quantity or variety, by any office in this state or country, outside of our large cities.

Occupying, as it does, two complete floors nearly a hundred feet deep; supplied as it is with extensive and complete fonts of all varieties of modern type and borders, and having an abundance of job and cylinder presses,—three of each and the only four-roller book press in the county;—and possessing these facilities away from exorbitant CITY RENTS, it is possible to produce the BEST OF PRINTING FOR A MODERATE PRICE.
